

Payroll Integration

More payroll provider partners mean more ways to simplify plan management.

To eliminate the time and effort you spend on communicating your payroll information to us, we partner with an extensive list of leading payroll providers. If you're not already taking advantage of payroll integration and are interested in doing so, please contact your payroll provider directly and, when approved by them for integration, contact your client service representative to make the necessary arrangements.

HOW IT WORKS

We integrate your payroll provider with the retirement recordkeeping platform, minimizing or eliminating the need for you to do so.¹

180° payroll integration: Contribution and census data from your payroll provider is transmitted directly from them to us, allowing us to update the recordkeeping system directly and process your contributions. Changes made by your participants on our site (deferral changes, new loans, or loan payoffs) will be reported to you and you will need to update your payroll provider.

360° payroll integration: Contribution and census data from your payroll provider is transmitted directly from them to us, allowing us to update the recordkeeping system directly and process your contributions. Changes made by your participants on our site (deferral changes, new loans, and loan payoffs) are communicated directly back to your payroll provider, eliminating your need to do so.

Updated 01/2024

For plan sponsor use only. Not for distribution to plan participants or the public.

¹If you have multiple affiliates within your corporation (sites A, B, C, etc.) that utilize different payroll providers, Payroll 360 is not available at this time.

²Payroll 360 integration is available for ADP Workforce Now plans only (including NextGen and TotalSource) through Payroll Integrations, LLC or ADP Databridge. Payroll 180 integration is also available directly with ADP for Workforce Now plans only. Integration for ADP Run plans (typically 50 or less employees) is not available.

³Payroll 360 integration available through Payroll Integrations, LLC.
